## Professional Experience

### Developer

*Konstratek - Broummanah*                                                      *2023 – Present*

- Developed websites using Archibus system, leveraging JavaScript, XML, SQL, and Java for efficient solutions.
- Utilized Tomcat as the web server for deploying and running the developed websites.
- Built websites utilizing React.js for frontend development and Node.js for backend, with SQL Server for database management, ensuring high performance and scalability.
- Implemented REST APIs to enable seamless communication between frontend (React) and backend (Node) systems.
- Designed and implemented a user-friendly tool to transform Excel files into properly organized formats, streamlining workflow for other employees.
- integrated React.js into the Archibus system, enhancing user interface and functionality while maintaining system integrity and performance.
- Provided ongoing support to maintain code quality and ensure system stability.
- Developed middleware utilizing Node.js and REST API integration with Okta, facilitating seamless synchronization between Software and Archibus system.
- Utilized Postman for testing and debugging REST API endpoints during development.

### Developer Integration

*Infostructure - Downtown*                                                           *2023*

- Worked with integration middleware using Oracle Service Bus (OSB), Oracle JDeveloper, XML, XSD and XQuery where I focused on integrating different applications through REST and SOAP APIs.
- Worked in designing and implementing data transformations, validations, and mapping using XSD and XQuery in OSB.
- Monitoring and optimizing middleware performance to ensure seamless communication and data exchange between different systems.
- Troubleshooting and resolving problems with middleware solutions.

### Junior Frontend Developer

*Adcreators Mena – Jbeil*                                                            *2022*

- Worked with an agile team on developing, maintaining, and tracking progress in projects and websites using tools such as Jira and Git.
- Worked on designing fully responsive using react.js and several others librarylike material UI and SCSS.
- Worked with redux for API and data control from the frontend.

## Education

- **Arts, Sciences and Technology University-AUL**                     **Jounieh, Lebanon**
  Bachelor of Science in Computer Science                                   *2022*

- **Collège des Sœurs des Saints-Cœurs**                              **Kfardebian, Lebanon**
  Lebanese Baccalaureate II, Life Sciences (SV)                             *2018*

## Summary Skills

- **Computer Skills:** JavaScript, Java, SQL, React.js and Redux, Node.js, REST API, CSS and SCSS, SOAP API, XSD and XQuery.
- **Technologies and tools:** VS Code, Jira, Git, Postman, Oracle JDeveloper, Tomcat.
- **Other skills:** Adobe Illustrator.
- **Professional skills:** Analytical Thinking, Problem-solving, Teamwork.
- **Languages:** English, Arabic, and French
